495		Item #: 71816 CHAIR,PNEUMATIC CIRCLE PLUS BEECHWOOD,SILVER MATTE FRAME Item Notes: Frames: For durability and strength, the frame is made from 30mm diameter recycled cold rolled steel tube. The seat understructure and back support uprights shall be made with 16mm diameter recycled cold rolled steel tube. The back and seat frame are made with one continuous piece of cold rolled steel tube that is welded onto the column. The frame is treated with an iron phosphate, which protects from corrosion. Trimmings and residuals are re-smelted and recycled. The frame is welded together, the weld points assure even weight distribution throughout the frame. Seat & Back: The seat and back shall be made of high strength beech hardwood veneer molded together in layers in 8 ply. It is finished with a water-based lacquer hardened with an ultra violet process. The Circle back chair is designed so it can be used as a hanger on the top of a table when not being used. The back on the Circle chair shall have polypropylene buttons on the bottom of the back to assure that when the chair is resting on a tabletop it does not damage the surface. A non-slip friction varnish is available on the seat. The back and seat are contoured for comfort. Base and Casters: The 5 leg 24" diameter steel base shall be equipped with five 2" diameter dual wheel black nylon casters secured to the base with friction ring retainers. Each end of the base shall be covered in a black plastic nylon cover to protect base from marring.Finish: The entire frame will be finished with a minimum of .030 thickness of epoxy powder coating, with no lead or cadmium. The epoxy powder is electro statically applied and the unused powder must be recaptured and recycled for use. Powder coating is done without use of organic solvents. The selection shall have 12 standard colors. Stacking Storage: The chair shall stack a minimum of 4 high on the floor to save storage space and ease of handling. SIS Flexback Series 214- No Substitute	1 - 1.0000 Each Purchase	1	0.0100	No
496		Item #: 72048 CHAIR,FOLDING BEECHWOOD,BLACK POWDERCOAT FRAME Item Notes: Frames: For durability and strength, the frame is made from 18x18mm diameter recycled cold rolled steel. The back support uprights shall have a welded ganging mechanism attached, standard with the frame to gang one chair to another in a single row. The frame is treated with an iron phosphate, which protects from corrosion. Trimmings and residuals are re-smelted and recycled. The frame is welded together, the weld points assure even weight distribution throughout the frame. The frame shall have a slim profile of 1.5" when folded. Seat & Back: The seat and back shall be made of high strength beech hardwood veneer molded together in layers in 8 ply. It is finished with a water-based lacquer hardened with an ultra violet process. The seat and back shall be attached to the frame with a blind head tamper proof screw and an acorn nut to assure that there are no sharp points on the chair. Glides: Each leg shall be equipped with a plastic glide. The glides are to have rounded edges with a flat bottom in contact with floor surfaces to minimize damage to various floor types and to allow sliding on carpeted surfaces. Glides are form fitted into the bottom of each leg to assure that the glide cannot be removed. Finish: The entire frame will be finished with a minimum of .030 thickness of epoxy powder coating, with no lead or cadmium. The epoxy powder is electro statically applied and the unused powder must be recaptured and recycled for use. Powder coating is done without use of organic solvents. Line Number	Lot Code	Item Description	Purchase Unit	Qty Required	Previous Unit Price (\$)	Sample Req'd
		<p>Item Notes: Standard Tops: The top shall have 1" high-density particleboard core. Particleboard to be a moncure particleboard, which consists of a composite panel, made of wood fiber bound together by a thermo setting resin. The face layer is to be a minimum of 43 lbs density. The particleboard adheres to the ANSI A208.1-1999 standard and is a grade M-2. The top surface shall be a minimum of .027" thick high-pressure laminate. Laminate selection consists of Formica, Pionite, Wilsonart and Nevamar. The bottom surface shall be a Polybak phenolic backer with a minimum of .020 thickness. The backer will have no added formaldehyde and will have a Class A flame spread rating. The backer will be impregnated with a polymer resin to resist moisture. The laminate and backer shall be permanently bonded to particleboard core using a cold press EBA glue. The tabletop ends shall have corners with a minimum 1" radius. The sealed particleboard is to have threaded metal inserts installed as standard Edge Types: 1.3mm PVC edge in beech, black, beige and gray 2.Post formed edge The top is designed to have a floating appearance over the frame. This is a unique design to complement the beauty of the frame as well as to provide a safety feature of no pinch points on all four sides of the table. The tabletop on one side shall be steplessly tilted, adjustable from 0-20 degrees by a hand wheel that shall be located on the right hand side of the frame. The tabletop on the other side is a fixed surface that stays at a height of 31 inches. The tilted tabletop shall be equipped with a ruler on the bottom of the surface to assure that materials will not slide off the surface in the tilt position. Frames: For durability and strength, the frame is made from 38 mm diameter, 14 gauge recycled cold rolled steel tube. The frame is treated with an iron phosphate, which protects from corrosion. Trimmings and residuals are re-smelted and recycled. The frame is welded together, the weld points assure even weight distribution throughout the frame. The frame is adjustable on one side with two hand wheels on either side of the table frame; the wheel loosens the telescoping leg. The frames are color coded to assure that the frame is evenly raised on either side. Standard features on frames; pneumatic cartridge for ease in height adjustment, chair hangers for storing, two interior casters and non-skid glides, a front modesty panel. Three box drawers that can be locked. Finish: The entire frame will be finished with a minimum of .030 thickness of epoxy powder coating, with no lead or cadmium. The epoxy powder is electro statically applied and the unused powder must be recaptured and recycled for use. Powder coating is done without use of organic solvents. 530		<p>Item #: 71323</p> <p>High-Density Mobile Storage SpaceWorks</p> <p>Item Notes: The shelving is a four-post/single entry and six-post/double entry design consisting of four basic components; universal upright, shelves, shelf supports and backstops; no clamps or special tools are required for assembly. There are no sway braces, gussets, nuts or bolts to slow assembly, or detract from form or function. The shelving has a clean appearance without holes on exposed front facial surfaces; sides of posts, shelves, backstops and center stops are slotted to accept dividers or to install backstops between posts. Double entry units can be configured with back-to-back independently positioned single entry shelves and /or through style double depth shelves between two common universal uprights and can be mixed or configured in any combination. The universal upright and removable end panel allow for easy add-on and reconfiguration of additional units without disassembling existing units. Single entry units can be attached to double-depth units without use of brackets, ties or clamps; no additional upright is required; all main structural components are interchangeable and can be used to reconfigure single depth units into double depth units using the universal uprights. Formed of 18 gauge cold rolled steel, the outside posts are rolled into a ¾" w hollow "box" shape with 1/8" w x 11/16" h chamfered slots punched on 1 ½" vertical centers along the ¼" inner walls to accept shelf support and 1/16" w x 11/16" h slots on post sides to accept backstop (single entry units only). There are no holes or slots on face of outside posts. Center posts (double entry units only) are formed of 18 gauge cold rolled steel and formed into a 1 ½" w x 5/16" h hat channel with a series of three (3) 1/16" w x 11/16" h slots positioned horizontally 5/16" center-to-center and 1 ½" centers vertically. Center post is comprised of two (2) opposing hat channels welded along both ¾" flanges of hat channel cross-section. The outside posts (front and back) and center posts are joined by welding 16 gauge 3 3/32" spacers, with ¼" stiffening flange on bottom edges, to maintain required distances apart and add rigidity to the assembly. All sizes of open uprights have three (3) spacers. Closed uprights have same specifications as open style except the 16 gauge spacers are replaced by welding a 22 gauge closure sheet between outside posts. All uprights are universal and can be interchanged at the beginning or intermediate section of the range configurations or used to add a section without disassembling adjacent section. END PANEL: Used to finish range end and close off open style uprights. Panel formed of 18 gauge cold rolled steel with two (2) ¾" vertical flanges formed 90 degrees to surface to fit around outside posts of upright. A series of 18 gauge clips welded in position to match location of upright spacers and panel is affixed to upright by hanging and is secured by the end panel clips. Uprights used with closed uprights have "key-hole" bracket welded in bottom position with independent clips to secure panel to upright. SHELF: The Shelf shall be formed of 18 gauge cold rolled steel with flanges on all sides and turned under in front and back on double entry and front only on single entry; front profile of all shelves will be 5/8". Shelves for filing shall have slots to accept file divider tabs equally spaced 2" on center - on row on single entry; two rows on double entry. Shelves are adjustable on 1 ½" centers. - VANERUM-STELTER - SWMCT362464BLA - NO SUBSTITUTION</p>	1 - 1.0000 Each Purchase	1	0.0100	No

<p>Item Notes: Cases are designed to be both attractive and strong incorporating solid .75" walls, tops and bottoms and solid backs that appear finished from any angle.All PartnerStudio cabinets are assembled using Re-connectible, Quarter-turn, Cam lock and stud hardware. 8mm un-glued dowels are used for proper alignment and additional shear strength.All modular PartnerStudio cabinets have a solid, overlay top, solid .75" thick finished back panel and full overlay doors.Finishes products are constructed from Particle Board substrates covered with either High Pressure Laminate (HPL) or Thermally Fused Melamine (TFM). In general, all cabinet bodies are constructed with .75" TFM panels while Doors, Drawers Fronts and Worksurfaces are covered with HPL (Doors and Drawer Fronts are two sided HPL, Worksurfaces are one side HPL, one side Phenolic Backer. Specific Panel finishes are detailed by product type below.Hardware Hinges: Standard hinges are European style, concealed, adjustable hinges with 125° opening, RPC, 5-knuckle hinge is available for an upcharge. Pulls: Door and drawer pulls are 96mm on center. Wire pulls are included as standard with other pull styles available per the accessories section of the catalog.Sides, Tops, Backs and Bottoms are constructed with .75" TFM surfaces. Shelves up to 32" are .75" TFM, 36" shelves are .75" core with 2 sides HPL..5mm PVC edge banding to match melamine on all exposed edges. All shelves have .5mm PVC edge banding.assembled with re-connectable, quarter-turn connectors. 8mm dowels are incorporated for alignment and additional sheer strength. Cabinets are not glued togetherTops are onset with Top overlapping sides and backs by .5mm. Doors are constructed with .75" panels with HPL on both sides (finished thickness is .875").Edges 2mm PVC edge on all exposed TFM panel edges. VANERUM-STELTER # PS32FH39 - NO SUBSTITUTION</p>						
532		<p>Item #: 71163 Cabinet, SchoolWorks 36"wx66"hx24"d on casters</p> <p>Item Notes: Bottom and frame shall be fully unitized fabricated from 20-gauge cold rolled steel, 1¼" 16-gauge square steel tubing, and 1" x 1" structural steel angle. Bottom/frame assembly shall be finished with a baked enamel metallic paint.Steel shelves are available. Laminate shelves shall be constructed with 1" thick, 45# particleboard substrate with thermally fused melamine surface (both sides).The front edge of each shelf shall be edge banded with 3mm thick PVC material bondedSteel shelves and shelf supports shall be constructed with 20-gauge cold-rolled steel.Parts shall be finished with a baked enamel metallic paint.Ends, top, back, fixed shelves, and partitions are constructed with 1" thick, 45# particleboard substrate with thermally fused melamine surface (both sides).Drawer fronts and doors are constructed with ¾" thick, 45# particleboard substrate with thermally fused melamine surface (both sides).All edges of top, drawer fronts, doors are edge banded with 3mm thick PVC material, bonded with hot-melt adhesive. Visually exposed edges on the ends, fixed shelves, and partitions are edge banded with 3mm thick PVC material, bonded with hot-melt adhesive.Caster Mounting: Four locking casters shall be plate mounted, dual plastic wheels with non-marking soft tread, and 5" in diameter. Caster assemblies shall be integral with cabinet frame on the outboard corners to maintain maximum cabinet stability.Leg Mounting: each 1¼" round leg shall be equipped with 1 plastic-base adjustable leveler to compensate for uneven floors with hot-melt adhesive. The remaining edges shall be edge banded with .018" thick PVC material bonded with hot-melt adhesive. VANERUM-STELTER # LWC366624 - NO SUBSTITUTION</p>	1 - 1.0000 Each Purchase	1	0.0100	No

<p>Item Notes: Carrel Panels: Ends, back, shelf and intermediate panel shall be constructed with 1" thick, 45# particleboard substrate with thermally fused melamine surface (both sides). Visually exposed edges of all panels shall be edge banded with 3mm thick PVC material bonded with hot-melt adhesive. End shall have a 3" radius on the top corners facing the user. The top shelf, when applicable is 12 inches deep from the back panel, and 1" from the top The ends shall be attached to the top shelf and back panel with concealed modular clips. No exposed fasteners shall be used.Top shall be constructed with 1 1/8" thick, 45# particleboard substrate with permanently bonded, .050" thick HPL (high-pressure laminate) surface. Top shall have a .020" phenolic backer sheet as a balance sheet. Corners of top shall have a 2" radius. All edges are edge banded with 3mm thick PVC material bonded with hot-melt adhesive. Adjustable legs are of telescopic type with 1/2" diameter, welded 12-gauge two-part construction upper leg to receive 1/4" diameter, 16-gauge round steel tube leg. Smooth adjustment is achieved with a set screw-style mechanism. Upper portion of adjustable leg is welded to a 10-gauge steel mounting plate. Legs are finished with a baked enamel metallic paint.Tables are mounted on either plastic-base adjustable levelers or four locking casters. Casters shall be stem mounted in welded insert, dual plastic wheels with non-marking soft tread, and 3" in diameter. Top shall be attached to each adjustable leg using 8 5/16-8 x 3/4" black oxide button head socket cap screws.A top greater than 48" wide shall have a support tube constructed of 1/4" 16-gauge square steel tubing attached to the underside of the top for added support. Modesty panel shall be fabricated from 20-gauge cold rolled steel and finished with a baked enamel metallic paint. Modesty panel comes in two height options 4" or 9". Modesty panel has rounded corners and is formed into a fan fold design. Modesty panel shall be attached to the tabletop using #10 x 3/4" pan head screws.VANERUM STELTER #LWT6030G2W01-LWKA306 - NO SUBSTITUTION</p>

		<p>Item Notes: TABLE,LIBRARY WOOD SINGLE FACE,LOW,NO SHELF SINGLE FACE: 60"LONG X 39"HIGH X 39"WIDE All woods used in the manufacture of TESCO furniture are selected to be of fine grade, free of imperfections, seasoned and kiln-dried to a moisture content of 5%-7%.All exterior woods shall be northern oak or maple, selected for uniformity of grain and color. All exposed veneers are of plain sliced oak or maple, lumber core plywood with face veneers 1/28" thick. All plywood meets the standard specifications of the National Plywood Association.Top to be of 1-1/4" thick TES-WOOD solid core with an oak or maple edge binder 3/4" x 1-1/4" finished to match other furniture. A vertical panel is recessed into the top and secured from the underside by wood screws. A division divider also attached as above.The shelf unit will be dadoed into sides and interlocked.Distance between dividers will be balanced equally with length of the top.A 14 ga. "v" shape reinforcing keel shall be attached to the underside of the index table top on tables up to 72" long. Tables over 72" long will have a five leg base.Leg construction will consist of two pieces of oak or maple glued to a 2-3/8" square. An apron trim of 1-1/8" x 2-1/8" thick solid oak or maple shall bridge the distance between legs on all four sides.The legs attached to top by means of a metal plate. This mounting plate is attached to the legs by means of 2 5/16" x 3/4" machine bolts into 5/8" diameter barrel nut inserted into leg. The plate is in turn attached to the table top by means of 4 5/16" x 1" machine bolts into metal inserts in the table top. High pressure plastic laminate meets N.E.M.A LD 3-3.1 specifications. Horizontal surfaces as unit tops are laminated with .050" thick laminate and a .020" thick phenolic backer sheets is applied on the reverse side of all horizontal surfaces.Vertical surfaces are laminated with .030" thick laminate on each side. TESCO 4000 SERIES MODEL #4002-271-111 no substitution.</p>
