Charlotte,
King City Director's Association
FAX: 206-251-8437

We are in receipt of your request for a Material Safety Data Sheet for the following product(s):

Paper Mate Dryline Adhesives

The Federal Right-To-Know law and most state statutes require chemical manufacturers to assess the hazards of chemicals they produce and to provide information such as MSDS's to their users. The MSDS's you have requested are for finished consumer products which are not covered by those laws. All Gillette products have been evaluated prior to marketing and are safe when used in accordance with the directions and cautions on the product label.

Sincerely,

Robert C. Spiker, Jr., Ph.D., CIH
Director, Occupational Hygiene
