254°C (490°F) C.O.C. Not Determined Not Determined Not Determined

Hazardous Combustion Products: Small quantities of butadiene, carbon dioxide, and carbon monoxide may be released during a fire.

EXPLOSION DATA:

Sensitivity To Impact: There is no evidence to show that this product is sensitive to physical shock.

Sensitivity To Static Discharge: There is no evidence to show that this product is sensitive to static discharge.

Extinguishing Media:

In case of fire, use dry chemical, carbon dioxide, or foam. Water may not be effective as an extinguishing agent. Water fog or spray may be used to provide a smothering effect on fire and to cool fire-exposed containers and surrounding combustibles. Do not use a solid stream of water because it can scatter and spread the fire.

Special Fire Fighting Procedures:

Do not enter fire area without proper protection. Heat may build pressure and rupture closed containers. Avoid direct personal contact with liquid even after fire is out.

Unusual Fire And Explosion Hazards:

Heat from fire can generate flammable vapor when mixed with air and ignited. Vapors can burn in open or explode if confined. Vapors may be heavier than air and travel long distances along ground before igniting/flashing back to vapor source. Fine sprays, mists may be combustible at temperatures below normal flash point.

SECTION V - REACTIVITY DATA

Chemical Stability: Stable

Hazardous Polymerization: Will not occur.

Conditions To Avoid: Oxidizing conditions, extreme temperatures.

Incompatibility (Materials To Avoid) Strong oxidizing agents, strong acids.

Hazardous Decomposition Products: Small quantities of butadiene, along with carbon monoxide and carbon dioxide may be released during a fire.
