Dear Valued Customer:

Enclosed is/are Material Safety Data Sheets (MSDS) for various DAP products. We have reviewed our products, conducted a hazard determination, and prepared an MSDS in compliance with the requirements of the Occupational Safety and Health Administration (OSHA) Hazard Communication Standard 29 CFR 1910.1200. The MSDS's layout follows the voluntary industry standard developed by the American Chemistry Council (ACC). The 16 - section standard MSDS format has also been adopted by the American National Standards Institute (ANSI) and the International Organization for Standardization (ISO) in an easier to read format, versus the previously used 10-section format.

If this product, or any component of it, is considered to be hazardous or carcinogenic under the OSHA Hazard Communication Standard, information is provided in Section 2 or Section 3. Also, the MSDS provides information on any toxic chemical subject to the reporting requirements of section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA).

For this MSDS to serve its intended purpose as an effective means of hazard communication, we request that you pass it along to all personnel that either handle or use the product. Also, please insure that those who are involved with the design, implementation, or any operation involving use of the product, review the MSDS. Please file this information with your permanent records of product information.

If you wish to receive this information in the future as an e-mail please send us an email at msds@dap.com and request that your company be added to our e-mail distribution list. We will need your name, phone number and DAP Account Number, which can be found above your address on this letter.

If you have any questions regarding the safe use and handling of any DAP products, a member of our Regulatory & Environmental Affairs Department will be happy to assist you, call 1-800-543-3840.
