

BFF {Best Friends Forever} Reverse Cantilever Chair

Materials and Finishes

Single-piece shell of injection-moulded polypropylene. Color is evenly dispersed. Shell is textured on front and back. Shell back features reinforcing, structural ribs to appropriately balance rigidity and flexibility. Front edge of seat gently curves downward for added comfort. Shell back incorporates finger holes allowing chair to easily be moved about.

Legs are composed of continuous tubular steel.

Sizes 1-2: 16-gage steel, 0.984" tube diam.

Sizes 3-6: 13-gauge steel, 1.06" tube diam.

Legs are connected with tubular steel crossbars beneath the seat. Four screws firmly attach shell to base. Standard frame finish is powder-coated silver.

Standard glides and plugs are composed of smooth black plastic. Optional glide upgrade includes a thermo-plastic floor contact pad.
