

Student Supply Program

2021-2022 School Year

Take advantage of **KCDA** for your Student Supply needs! Schools initiating a Student Supply program ensure that each child begins the coming school year with the exact same set of supplies regardless of family income. Each Student Supply program can be customized with a product mix appropriate for each learning level.

Here's how our program works:

- KCDA procures and inventories high-quality, cost-competitive student supplies and makes them available to schools from our Kent, WA distribution facility.
- Upon receiving student supply orders, KCDA packs and ships the student supplies to each school location. Student Supply materials can be ordered and shipped by grade level to facilitate easier distribution.
- School staff and parent volunteers receive the student supplies and create Student Supply kits. (Available kit options include boxes, Ziploc plastic bags or backpacks).
- Participating schools insure equity between students regardless of income. Schools control the quality of the student supplies by selecting items they know will work in their classroom environment rather than have students arrive with inferior items. As a non-profit government agency, KCDA is able to offer significant cost savings vs. pricing from many commercial vendors.
- KCDA offers product returns and/or exchanges through the end of September to ensure the student supplies ordered meet each individual school's needs.
- Student Supply program funding can be customized to meet the need of each individual school. Schools may choose to fund these supplies out of their budget, charge parents, or have the purchase funded by their PTA. Invoices for delivered product must be paid by the school through their membership with KCDA.
