

Connect students and staff to a virtual classroom.

No matter what you are trying to achieve for your K-12 school or higher education institution, we can help you find the right technology to make it happen. Kajeet was built for Education and with the safety of students in mind. Keep students on track in a digital classroom and keep tabs on the devices you provide.

INDUSTRY: EDUCATION

	Use Case Description	Kajeet Features and Benefits
College Student Access	Connectivity and device solutions to help bridge the digital divide that exists for low-income community college students that also qualify for free tuition programs. Anytime, anywhere access to critical learning resources combined with free tuition, evens the playing field for these underserved student populations and sets them up for success.	Features and Benefits Specific to College Student Access: <ul style="list-style-type: none">• Federal funding eligible solutions• Higher-education specific customized filters• Device and data management for cost control• Multi-network options for access across locations• Content filtering to keep data costs low
Distance Learning	Addressing digital inequity by enabling access to course materials and homework after school hours or during remote and distance learning.	Features and Benefits Specific to Distance Learning: <ul style="list-style-type: none">• CIPA-compliant filters for student security• Fixed-monthly rates alleviating the need for large up-front costs• Media Center for check in and out capabilities• Lost and stolen status
School Bus WiFi	School bus WiFi turns your bus fleet into a mobile WiFi hotspot. Kajeet's SmartBus solution connects up to 65 students at a time, this makes it ideal for daily bus routes, athletic buses, field trips, mobile STEM labs, and bookmobiles. Amid school closures, internet-enabled school buses are parked in school parking lots, neighborhoods, apartment complexes, and mobile home parks to create community hotspots for students.	Features and Benefits Specific to School Bus WiFi: <ul style="list-style-type: none">• Multiple hardware options – Portable Kits or Hard Install• Dual-SIM support – Multi-network options for automated access across networks when in route• Live GPS Tracking and Triangulation for visibility into where your active vehicles at all times.
