

Executive Summary

Sports Theater Lighting

PLANLED™

Overview

Planled's Sports Theater System transforms ordinary gyms into state-of-the-art, multi-purpose venues.

Problem

School gyms are lit with industrial high bays that make everything look flat, often with harmful, invisible flickers.

Solution

Combining our expertise in professional sports lighting design with advanced DMX control, users can have the following scenes at their fingertips:

Competition Mode

Focused lighting on the sports court, dimmed seating area, and meeting IES Class II standards for competition or recreational play

Speaker Mode

Spotlight on the speaker and an RGB backdrop that best suits the occasion

Stage Mode

Larger spotlight on the stage area and an RGB backdrop that best suits the occasion

Dynamic Light Show

Pre-programmed light progression with the option to sync with music

Qualification

Planled is a recognized authority in the professional sports lighting industry, known as the first to bring LED technology to MLB at T-Mobile Park, and served as the official lighting partner for Yankee Stadium, Moda Center, SAP Center, Dickies Arena, Ball Arena, and Busch Stadium.

Impact

The Sports Theater System will help unite school communities through sports, music, and community events, offering an enhanced fan engagement, improved performance for athletes, and a pleasant experience for the photosensitive population.
